Final Project

Justin Hsie, Bingyu Sun, Eleanor Zhang, Annie Yu
12/15/2018

Data Import

```
cancer_raw =
  read_csv("./data/Cancer_Registry.csv") %>%
  janitor::clean_names() %>%
  dplyr::select(target_death_rate, geography, everything()) %>%
  separate(geography, into = c("county", "state"), sep = ",")
```

Data varibale dictionary:

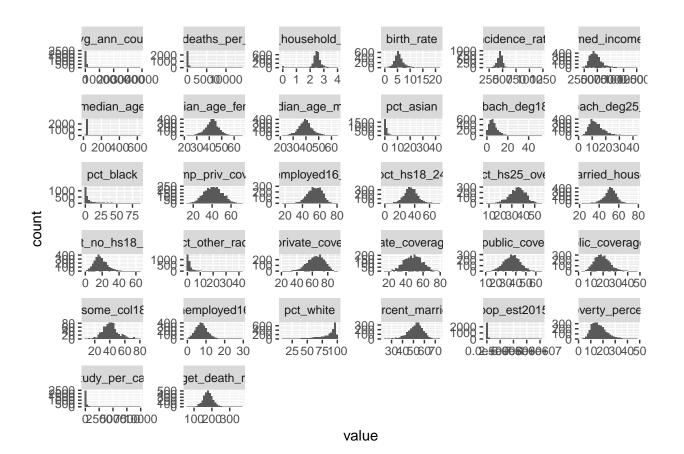

- target_death_rate: mean per capita (100,000) cancer mortalities (a)
- avg_ann_count: mean number of reported cases of cancer diagnosed annually (a)
- avg_deaths_per_year: mean number of reported mortalities due to cancer (a)
- incidence_rate: mean per capita (100,000) cancer diagnoses (a)
- med_income: median income per county (b)
- pop_est2015: population of county (b)
- **poverty_percent:** percent of population in poverty (b)
- study_per_cap per capita number of cancer-related clinical trials per county (a)
- binned_inc: median income per capita binned by decile (b)
- median age: median age of county residents (b)
- median_age_male: median age of male county residents (b)
- median_age_female: median age of female county residents (b)
- **geography:** county name (b)
- avg household size: mean household size of county (b)
- percent married: percent of county residents who are married (b)
- pct_no_hs18_24: percent of county residents ages 18-24 highest education attained: less than high school (b)
- pct_hs18_24: percent of county residents ages 18-24 highest education attained: high school diploma (b)
- pct_some_col18_24: percent of county residents ages 18-24 highest education attained: some college (b)
- pct_bach_deg18_24: percent of county residents ages 18-24 highest education attained: bachelor's degree (b)
- pct_hs25_over: percent of county residents ages 25 and over highest education attained: high school diploma (b)
- pct_bach_deg25_over: percent of county residents ages 25 and over highest education attained: bachelor's degree (b)
- pct_employed16_over: percent of county residents ages 16 and over employed (b)
- pct unemployed16 over: percent of county residents ages 16 and over unemployed (b)
- pct private coverage: percent of county residents with private health coverage (b)
- pct_private_coverage_alone: percent of county residents with private health coverage alone (no public assistance) (b)

- pct_emp_priv_coverage: percent of county residents with employee-provided private health coverage (b)
- pct_public_coverage: percent of county residents with government-provided health coverage (b)
- pct_public_coverage_alone: percent of county residents with government-provided health coverage alone (b)
- pct_white: percent of county residents who identify as White (b)
- pct_black: percent of county residents who identify as Black (b)
- pct_asian: percent of county residents who identify as Asian (b)
- **pct_other_race:** percent of county residents who identify in a category which is not White, Black, or Asian (b)
- pct_married_households: percent of married households (b)
- birth_rate: number of live births relative to number of women in county (b)

Look at the distribution of all varibales:

```
cancer_raw %>%
  keep(is.numeric) %>%
  gather() %>%
  ggplot(aes(value)) +
  facet_wrap(~ key, scales = "free") +
  geom_histogram(bins = 30)
```

Warning: Removed 3046 rows containing non-finite values (stat_bin).

Choose variables:

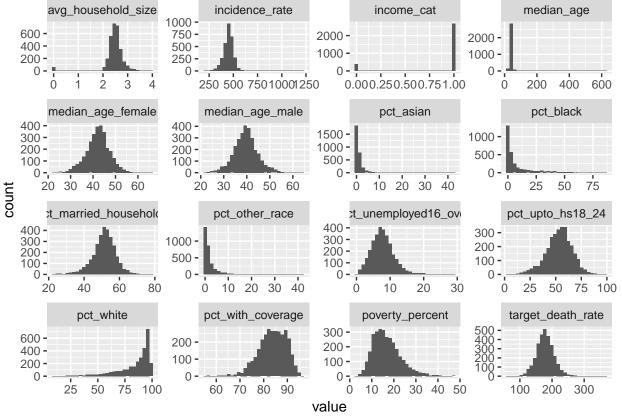

Check correlation and distribution:

```
cor(cancer_county) %>%
knitr::kable()
```
